

ENVIRONMENTAL, HEALTH, AND SAFETY (EHS)

(Formerly Health, Safety, and Environmental Technology)

(Entire degree can be completed online.)

Program Description

Health, safety and environmental technicians protect employees and the public by controlling hazards in the workplace. EHS professionals apply the principles of math, science, engineering, communications and economics to the protection of people, property and the environment. The EHS program focuses on environmental, health and safety regulations and compliance. Graduates are trained to assist an organization in the management of hazardous materials and wastes, to protect workers and the environment, and to minimize the organization's Worker's Compensation.

Award Options

Associate in Applied Science Degree
Certificate

Job Outlook

Employment of occupational health and safety technicians is expected to increase 13 percent during the 2010–20 decade, faster than the average for all occupations, reflecting a balance of continuing public demand for a safe and healthy work environment against the desire for fewer government regulations. Median annual wages of occupational health and safety technicians were \$47,440 in May 2014. The lowest 10 percent earned less than \$27,580, and the top 10 percent earned more than \$72,220.
